we are ace

**We design innovation, providing engineering services, project management and consultancy in the construction industry with an integrated approach to architecture and interior design. With the skill and the typical know-how of an artisan, we always look for cutting-edge customized solutions, maintaining an ethical, mindful vision of a continuously-changing world.**

**We envision a joyful world, for each one of us, and for all of us together. We firmly believe in the power of teamwork, in the strength of will and determination, and in a passionate obsession with quality. We take inspiration from the creative, one-size-does-not-fit-all approach of the finest Italian tailors. And always with the ultimate aim of delivering on targets.**

we are

We are an engineering design firm dedicated to serving the Design and Architecture sectors. In addition to engineering services, we offer skilled project management and consulting for the construction sector, with an integrated approach to architectural planning and design. We respond to change with an artisan's skill and ingenuity; we design innovation with an ethical and mindful view of the world and the people who live in it. Like Italian haute couture, we take cues from our clients' quality, creativity, and objectives to develop ideas into processes and projects that make an impact. ace was launched on 31.05.2021: it's a story of friendship, ambitious dreams, shared values, excellence, and passion for our work.

# fondatori

Two partners who studied at the Università degli Studi di Firenze and have since grown professionally in related, complementary fields, united by our work ethic and deeply shared values: We're Antonio and Marco. We believe in the power of teamwork, in the importance of delivering on targets, and in a positive obsession with everything that's "done well." Working side by side, we've developed a mutual inclination to think outside the box, to go beyond the pre-established ways and patterns, the conventional habits and the insularity we have run into in our discipline. Doing our best at our job makes us proud and fulfilled, and innovation arises from awareness.

# squadra

We are a multidisciplinary studio with 30 people from more than 10 countries. Our diverse professional backgrounds mean we can offer a range of complementary skills: we're experts in Project Management, BIM modeling, structural planning, plant design, and architectural, implementation and construction projects for architecture and design studios and businesses. We all share a passion for our work, a lifelong curiosity and the desire to bring innovation to our disciplines. We believe in teamwork and synergy among skill sets to help us grow, together and individually. Our ambition as a group is to bring a variety of questions to the table and work collaboratively to come up with answers.

we think

**Aware**

We're aware of the speed with which the world is changing, and we want to actively participate in making it better, adapting to changes.

**Human**

We take a holistic approach to planning – we see it as an organism in continuous development and improvement.

**Happy**

We believe in having a positive attitude to work and to life, individually and for all of us together, for the present that shapes our future.

**Rooted**

We feel a deep connection to our local and national territory and its history; this is what underpins our drive towards global innovation.

**True**

We explore new terrain in a sort of permanent experimental laboratory, and we question cast-iron certitudes.

**Welcoming**

We know that the right words at the right time matter, and we apply this principle with the people around us.

**Smart**

We work with meticulousness and dedication every day, thanks to passion guided by intelligence.

**Essential**

We strive for straightforward communication that lets us maintain equilibrium as our work evolves continuously, without getting mired in the superfluous.

**Healthy**

We respect our bodies and we take care of them, because we know they are the guardians of our minds

**Joint**

We believe in the science: the whole is greater than the sum of its parts.

we do

We develop ideas and transform them into processes, projects and constructions in an ethical, responsible way. In addition to services related to engineering, we provide creative support to architects and designers in the project development phase. We make room for dialogue and understand the importance of listening, and we aim to create relationships of trust with all our clients. We describe our work as a dynamic balance between technical preparation and creative energy, between micro- and macro-scale, between knowledge of historical exemplars in various design disciplines and a keen desire to innovate. We seek out the best solutions in a continuously-changing world: like tailors, we offer customized solutions, aiming to strike a balance between emergent needs and the finite capacities of our planet.

# method and tools

We consider technology a means, never an end: we take full advantage of the latest technological advancements, continuously updating ourselves to keep in step with the sector. All of the instruments we use – in particular those dealing with BIM content, in which we've developed exceptional expertise – are carefully chosen to support the highest level of speed and precision in execution. We guarantee efficiency thanks to our use of the best software and an optimal work flow organization, offering the utmost attention to the quality of our deliverables. In keeping with the ace philosophy, we are a permanent R&D lab exploring our disciplines: design entails controlling change.

# confidentiality

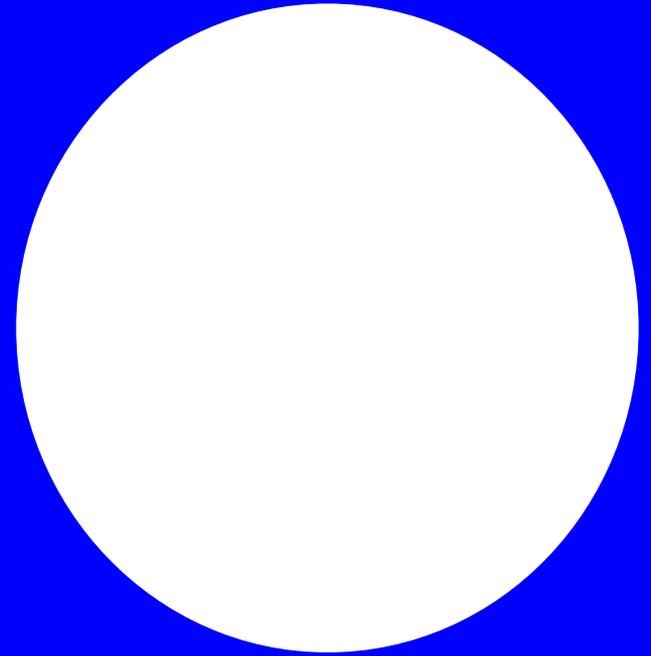

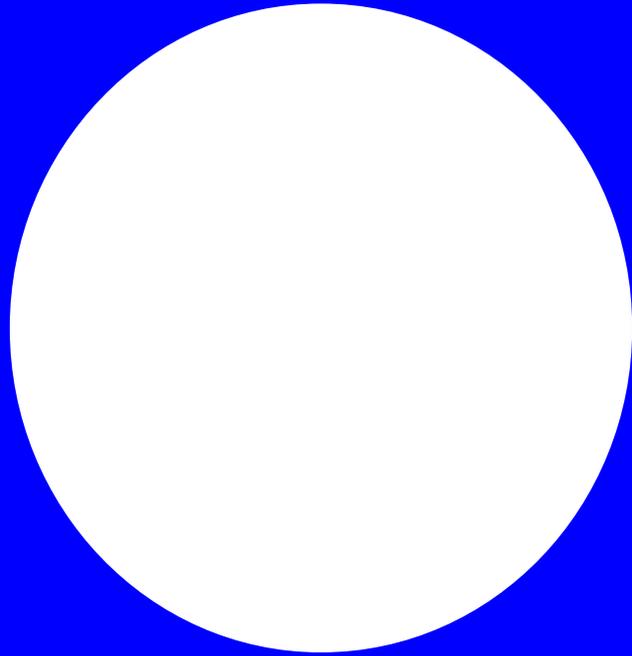

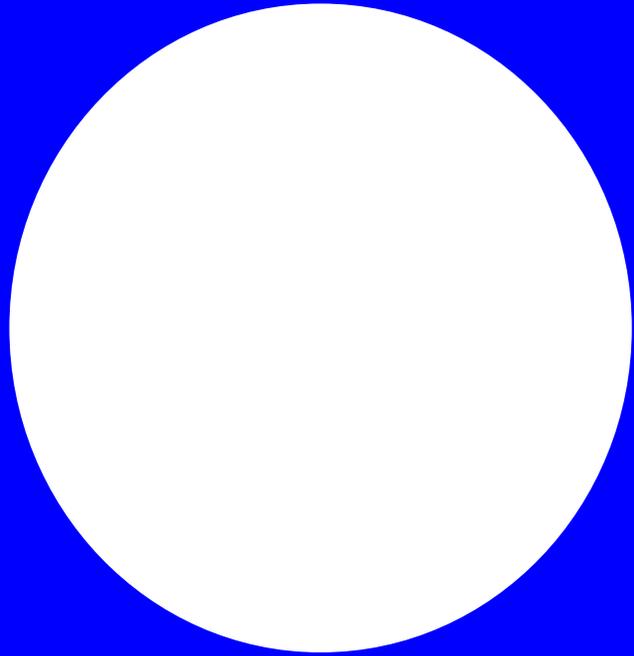

We sign very strict confidentiality agreements with our clients. Our goal is to create a long-term relationship of trust with each one of them. We believe in the value of word-of-mouth referrals as an inestimable means of sharing information and expressing mutual esteem.

**joint ventures**

We are active in projects in complementary sectors so we can offer our clients a full range of services

[SA-FE] Building safety certification

[ROOF&ROOTS] Real estate, property finding and consulting
